

## PRESENTATIONS

**MARCH 2011**

*The forum objectives include:*

- Promote increased awareness and understanding of the impacts of climate change to the Prairie terrestrial ecosystems and targeted sectors and decision making applications/gaps across the prairies and within each province
- Foster enhanced inter-provincial collaboration on PRAC terrestrial activities
- Provide updates on work to date, planned activities, build on existing and new collaboration opportunities and partnerships
- Align PRAC Terrestrial theme activities and outputs with DEM and Water Resources Management as possible and practical
- Share successes/best practices, lessons learned, challenges, progress and gaps in addressing targeted policies to date and identify opportunities to collaborate to help improve outcomes. Discuss potential policy options and recommendations for the Prairies RAC terrestrial theme final report
